

# VIBRO-ACOUSTICS INCOME PROJECTION FOR BUSINESSES

Vibro-Acoustic Therapy has been used as a therapeutic and relaxation tool since it was first developed in the 1980s. Research indicates that this FDA-approved therapy may reduce anxiety, depression, and fatigue all while serving as a pain management tool. The therapy combines vibrations and music at low frequencies that are non-invasive to the body, driving the body to a reset and meditative state. This therapy can bring countless benefits to individuals in a patient or customer setting while providing the potential to drive and increase revenue for any business model.

Here are some examples of cost per session on Vibro-acoustic Beds and examples of income projection for your business.

## TREATMENT AVERAGE SESSIONS (Vibe Bed with BrainTap)

PRICE/SESSION	# PATIENTS
